Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/26/06 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3, 9-21, 25 and 27-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as filed, does not describe a **continuous** circular coil as claimed in claim 1-line 10; claim 14, lines 2-3; claim 28-line 10; claim 29, line 2; claim 29-lines 2 and 4; claim 30-lines 3-4; claim 31-lines 3 and 5-6; and claim 31-line 4. Additionally, the specification, as filed, does not describe a **continuous** serpentine coil as claimed in claim 1-line 10 and

line 11 (two occurrences); claim 27-line 2 and line 6; claim 28-lines 9 and 11-12; claim 29-lines 3 and 5-6; claim 30-lines 2 and 5; claim 31-lines 2-3 and 5-6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 32 is rejected under 35 U.S.C. 102(b) as being anticipated by Gates, U.S. Patent 5,731,565.

Gates shows the invention as claimed including an inductively coupled plasma generating apparatus comprising: an evacuated reaction chamber 10; an antenna 50 installed at an upper portion of the reaction chamber to induce an electric field for ionizing reaction gas supplied into the reaction chamber and generating plasma; and a radio frequency power source connected to the antenna to apply radio frequency power to the antenna, wherein the antenna comprises three coils: a first center, circular coil 52; a second coil surrounding the first coil; and a third coil 54 communicatively connecting the first coil to the second coil (note that in col. 5-lines 16-19 it is stated that three or more coils can be used); wherein the second coil has inner portions complementary to the outer surface of the first coil, outer portions complementary to the inner surface of the third coil and connecting portions connecting the inner portions and the outer portions, wherein the third coil has inner portions complementary to the outer

surface of the second coil, outer portions complementary to the inner surface of the reaction chamber and connecting portions connecting the inner portions and outer portions, and wherein the first, second, and third coils do not overlap each other (see figs. 3-6 and their descriptions).

Response to Arguments

Applicant's arguments with respect to claim 32 have been considered but are moot in view of the new ground(s) of rejection. Concerning the 112-first paragraph rejection over claims 1-3, 9-21, 25 and 27-31, note that the rejection has not been overcome and therefore the rejection is respectfully maintained.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luz L. Alejandro whose telephone number is 571-272-1430. The examiner can normally be reached on Monday to Thursday from 7:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Parviz Hassanzadeh can be reached on 571-272-1435. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
